

2012 GREENHOUSE GAS EMISSIONS SUMMARY

In 2012, we made progress towards all of our new greenhouse gas reduction and renewable energy targets.

OFFICES, RETAIL, DISTRIBUTION

TARGET:  25% reduction in greenhouse gas emissions by 2020

GREENHOUSE GAS EMISSIONS

We reduced our absolute Scope 1 & 2 emissions from offices, retail, and distribution centers by 15% compared to 2007 and are on track to meet our goal.

RENEWABLE ENERGY

TARGET:  20% of energy purchases from renewable sources by 2020

RENEWABLE ENERGY PURCHASES

We increased our renewable energy purchases to 14% and are on track to meet our renewable energy goal.

FACTORIES

FACTORIES: GHG EMISSIONS PER PRODUCT

TARGET:  5% annual reduction of greenhouse gas emissions per product

Carbon intensity per product shipped from our factories was down 3% compared to last year, slightly less than our 5% target.

CHANGES FROM 2011 INVENTORY:

We corrected a conversion error in our steam energy calculations that affected one factory in our 2011 inventory. Approximately 35% of the reduction in our 2012 carbon intensity in factories was due to this update, while 3% of the reduction was due to energy efficiency improvements.

2012 GREENHOUSE GAS EMISSIONS SUMMARY

SUMMARY

REDUCTION IN SCOPE 1 & 2 GHG EMISSIONS FROM 2007 BASELINE

NOTEWORTHY PROJECTS IN 2012:

- Our factory in Turkey installed a heat recovery system to capture waste heat from dryers in the factory, decreasing steam energy usage by 25%.
- We started lighting retrofits to replace halogen track lights with LED lamps in US retail stores.
- We remodeled three corporate offices with energy efficiency upgrades.
